Repetitive behaviors can also involve saying, thinking about, or asking about the same thing over and over again. In rare cases, repetitive behaviors can actually be dangerous; more often, though, they're a tool for self-calming. ?? They can become a problem when they get in the way of ordinary activities or make it tough to get through school or work.

An autistic savant is an autistic person with extreme talent in one or more areas of study. Although there is a common association between savant syndrome and autism (an association made popular by the 1988 film Rain Man), most autistic people are not savants and savantism is not unique to autistic people, though there does seem to be some relation. 1 in 10 autistic people may have notable ...
